**SEARS MAKES IT SO EASY
TO SHOP BY PHONE**

Just call Sears and say you want to place a catalog order

HOW TO ORDER

Please read carefully . . give ALL the information required

This is a catalog of replacement parts and accessories for Jeep® vehicles. In it you will find Sears brand and other name-brand merchandise. All merchandise in this catalog is of high quality . . it equals or exceeds original-equipment quality. And, of course, all merchandise is backed by Sears famous policy of Satisfaction Guaranteed or Your Money Back.

Merchandise in this catalog can be bought on Sears Easy Terms or Revolving Charge Account. To open a Sears Charge Account, just call Sears or visit any Sears Retail Store or Catalog Selling Unit. Please read all ordering and shipping information below. Be sure to order the correct parts for your Jeep® vehicle. See table on facing page for information on model identification.

YOU CAN ORDER ANY ONE OF FOUR WAYS

- 1. Catalog Sales Office or Sears Authorized Catalog Sales Merchant**—Order through your nearest Sears Catalog Selling Unit. A reference copy of this Catalog is available.
- 2. Retail Store Catalog Sales Department**—Sears Retail Stores have a Catalog Sales Dept. where trained sales people will help you make a selection and write your order.
- 3. Shop by Phone**—It's the easiest way to shop. Phone in your Easy Payment and Sears Revolving Charge Account orders, too. Delivery direct to your home, or pick it up at the Catalog Selling Unit or Retail Store Catalog Sales Department nearest you.
- 4. Shop at Home by Mail**—List all the items you want on a Sears Order Blank or any plain piece of paper. Print your full name and address, including rural route and box number if necessary. Include all catalog numbers and descriptions of wanted items.

IMPORTANT PRICE AND TAX NOTICE

Prices in this catalog are in effect until February 28, 1974. Whenever any Sears catalog item is reduced in price in a Sears sale book or value supplement which is current with the catalog you are using, your order will be filled at that reduced price. Prices in this catalog apply only to orders placed by mail, telephone, telegraph or placed in person at a Sears Catalog Sales Office, Authorized Catalog Sales Merchant or at a Catalog Sales Department in a Retail Store, Retail Catalog and Appliance Store or in a Sears Affiliated Store.

Except where stated otherwise on specific items, prices quoted in this catalog do not include charges for transporting goods from our distribution centers to a Sears Selling Unit for pick-up, or for delivery to your home.

The law requires us to collect tax on sales at rate for your state in the chart below.

FACTORY OR CENTRAL WAREHOUSE PARTS ORDERS

Items with an "F" prefix (such as F28 LM 10046) are shipped from a central warehouse near Chicago, Ill. or other designated factory location. These parts can not be ordered C.O.D. Items weighing less than 1 pound are shipped postpaid. On mailable items over 1 pound, allow shipping and handling charges based on your distance from nearest Catalog Merchandise Distribution Center.

FREIGHT AND EXPRESS INFORMATION

Shipping and delivery charges are based on distance and weight. See rate tables in Big Book or write your Sears Catalog Merchandise Distribution Center for approximate charges. Articles to be shipped from factory or warehouse may be ordered with goods from our Catalog Merchandise Distribution Center; however, they will be shipped separately with separate shipping charges.

If you order on Sears Easy Terms or Revolving Charge Account, shipping charges are added to your account. You need not figure these transportation charges.

NOTE: On cash orders, if there is no freight or express agent in your town, you must include money to prepay shipping charges with your order. If you send us too much for shipping charges, we will refund the difference.

SEARS GUARANTEE

Satisfaction Guaranteed or Your Money Back

Whatever you buy at Sears, you have the right to use it for a reasonable time before you decide you think it is satisfactory and want to keep it. If you decide it is not satisfactory, return it to us at our expense. We will do whatever is necessary to correct the cause of your dissatisfaction. If we can't satisfactorily provide a remedy, or if you request a refund, we will refund your full purchase price including any delivery and finance charges.

PARCEL POST INFORMATION

Packages weighing up to 70 pounds and measuring not more than 100 inches in length and girth can be sent by parcel post in all parcel post zones, except catalog numbers followed by "L".

"L" items (as 28 LM 9727L) cannot be mailed from a first class post office to a first class post office for city delivery in any parcel post zone. (This does not apply to rural route addresses.) Your Catalog Plant is served by a first class post office. Your Postmaster or carrier can tell you if you are served by a first class post office.

Catalog numbers ending with "N," "N2," "NH," etc. are always unmailable.

C.O.D. MAIL ORDERS

We strongly urge you not to order C.O.D. . . such orders involve high extra charges to you. When ordering by mail, it is to your benefit to send a money order, check or use Sears Credit Terms. On parcel post C.O.D. shipments, in addition to parcel post charges, you must pay a C.O.D. collection fee—an extra charge the post office makes for handling C.O.D. shipments. The post office also charges you a money order fee for forwarding payment to us.

We do not ship C.O.D. orders—for merchandise shipped direct from factory; for merchandise shipped to foreign countries; for merchandise shipped to anyone other than the person sending us the order. The best ways to send money are by post office money order or express money order, or by bank draft or check. Do not send postage stamps, coins or paper money.

SEARS HAS A CREDIT PLAN TO SUIT YOUR NEEDS..

See Sears Big Book or contact any Sears Retail Store or Catalog Selling Unit for complete information on Sears Revolving Charge or Easy Payment plans.

HOW TO IDENTIFY YOUR JEEP® VEHICLE

Listed below is an identification guide of the characteristics of the various Jeep® vehicle models. This guide will help simplify your selection of the correct part number for your specific model of Jeep® vehicle.

Many of the pages will contain an illustration of the type of parts listed in the charts. This may be a picture of a "typical" part, perhaps slightly different from the exact one we ship you for your particular vehicle. Be sure to select parts carefully... double check to be certain that they fit your particular year and model type.

We suggest you call your Catalog Sales Office to make certain the particular battery size needed for your vehicle is in stock.

- fully charged
- ready to install

Make Sears your first and probably only stop for batteries—whether you want to equip a single golf cart or a fleet of trucks. Sears DieHard® and High Voltage Batteries are especially great for vehicles with lots of electrical accessories. Or vehicles driven in bitter cold winter or blistering hot summer. Or vehicles that need an extra nudge to get going.

These batteries also give you extra usable power in two ways: 1. *High Voltage* . . straight-through-the-partition cell connectors deliver more initial starting power than an otherwise identical battery with up-and-over cell connectors. 2. *Polypropylene cases* . . DieHard and most High Voltage Batteries have cases made of translucent polypropylene plastic instead of the hard rubber used in most conventional battery cases. Because of its superior strength, the walls can be made thinner to provide more room inside for more or larger plates and more acid. This means extra usable power for your car.

Sluggish Performance?

New pistons can help boost compression, power and performance

Low as **\$4.99**

Aluminum alloy pistons are heat treated for proper hardness. Aluminum alloy resists wear and contributes to long piston life. Pistons are X-ray tested to detect internal flaws which might cause weakening. Each piston comes complete with fitted pin.

Pistons are sold individually, but we recommend that you replace entire set for best results. If your engine's cylinders are tapered .005 inch or more, we suggest that you have cylinders rebored and honed for the use of oversized pistons.

Standard Piston with pin.

For models MB, M38, M38A1, CJ2A, CJ3A, CJ3B, CJ5 (4-cyl.), CJ6 (4-cyl.), C101 (4-cyl.).

Chrome-plated Steel Piston Ring Sets

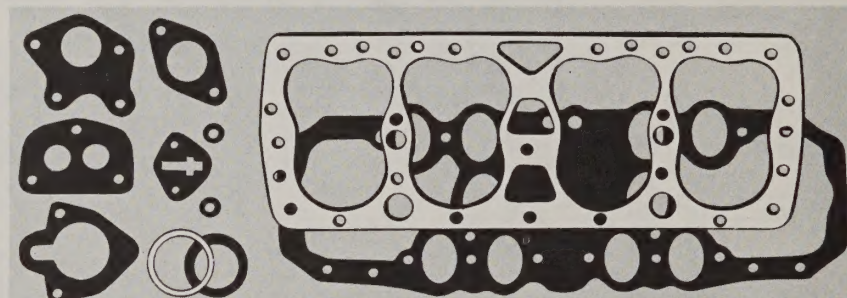

Low as **\$7.39** set

Specifically designed to stop excessive oil pumping, save on gas and oil and reduce excess cylinder wear. Premium-quality high-carbon construction helps retain the high spring-rate required to give these rings long, effective life. They are specially seasoned, already broken in to let you get right back to your regular driving. A razor-sharp hairline edge on the top and second compression rings gives the immediate seating necessary for minimum oil consumption.

The harder your engine works the hotter it gets. Pulling loads and scaling rocky hills and mountain roads can really put the heat on a Jeep® vehicle engine. That's why your radiator must be in working order . . . to keep things cool. And these radiators are specially designed to perform well when the heat is on. Solid brass tanks and tubes with copper cooling fins are rustproof to keep passages clear and water circulating freely. Core and cooling fin with double-locked seams for durability. Terne-plated steel mounting bracket resists rust and corrosion. See *How to Order* on page 2.

Low **\$15.69** as

If your Jeep's temperature gauge registers abnormal highs, chances are the water pump needs replacing. Engine coolant must keep circulating to remove the enormous heat buildup your engine is capable of producing. These water pumps are built to maintain the correct flow of coolant—up to 10,000 gallons per hour—to keep your engine at a safe operating temperature and prevent dangerous overheating. Cools engine in summer, helps keep Jeep's interior warm in winter. Equals or exceeds original equipment, designed to exactly fit your model.

Tune up your own engine with Sears Testing Equipment

ENGINE TESTING TUNE-UP KIT

All the testers you need to tune your car... our finest Engine Analyzer plus DC Timing Light, Compression Tester, Remote Starter Switch and Combination Vacuum Gauge/Fuel Pump/PCV Valve Tester

\$129⁰⁰

Self-powered Penske Portable Engine Analyzer (28 LM 21032C, also sold separately below) tests all electrical systems on 4, 6 or 8-cylinder engines. Performs 52 separate tests. Selector switch is keyed by color and number to 12 easy-to-read meter scales. D'Arsonval movement; solid-state circuitry. Tests transistor, magneto, conventional systems. Uses 3 "C" batteries (included). Checks alternator-generator, voltage regulator, point dwell, diodes, battery and condenser. Scales include 0-1200, 0-6000 RPM; 0-60° dwell; 5-0-90 amps; 0-50 spark output; 0-2000, 0-40,000 ohms; 0-3.2, 0-16, 0-32 volts; point resistance; diodes; condenser. Steel case measures 11x8x6½ in. deep. Includes spark plug adapters, jumper wires, ammeter and test leads, battery post adapters and 32 page instruction manual describing testing procedures.

Kit also includes time saving **Remote Starter Switch** for cranking engine from outside your car. The **Penske Compression Tester** has easy-to-read 2½-inch dial; tests pressure up to 300 p.s.i. **Penske Combination Vacuum Gauge/Fuel Pump/PCV Valve Tester** has big 3½-inch dial that shows 0-30 inches of engine vacuum and 0-10 pounds of pressure for fuel pump testing.

DC-powered Penske Timing Light (28 LM 2115, also sold separately below) has prefocused light bright enough for daylight use. Works from car battery. Tests 6, 12, 24-volt and magneto systems. Checks engine timing, distributor action, centrifugal advance and governor action. Trigger switch permits Xenon flash tube to fire light only when you need it... extends life of flash tube. Chrome-plated metal housing. Burnout-proof circuit with automatic overload protection. Automatic reverse polarity protection. 10½ in. long barrel with rubber nose cone. Timing Light includes spark-plug adapters for domestic and imported cars, leads and operating instructions.

28 LM 2106C—Complete Tune-up Kit—Wt. 20 lbs. Kit \$129.00
28 LM 21032C—Portable Engine Analyzer only—Wt. 11 lbs. \$84.95
28 LM 2115—DC-powered Timing Light only—Wt. 3 lbs. 14 oz. \$26.95

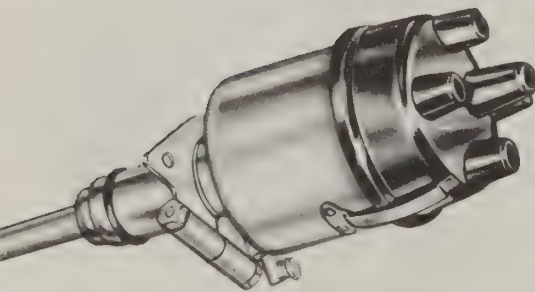

Dwell Tachometer

\$49⁴⁵

Works on any voltage... tests ignition systems with external connections. Performs at least 7 separate engine tests: rpm settings, point dwell, point resistance, cylinder balance, carburetor adjustment, breaker plate wear and governor settings. Color-coded easy-to-read scales. D'Arsonval movement. Solid-state circuitry. Dwell circuit independent of point resistance. Gives accurate readings regardless of point condition. High, low rpm range. Scales: 0-1200 and 0-6000 rpm; 20-90° dwell and point resistance. Aluminum housing 3½x3¼x8¼ in. high. With lead wires, insulated clips, operating instruction manual and Delco Unitized Ignition Adapter.

28 LM 21014—Shipping weight 2 lbs. 6 oz. \$49.45

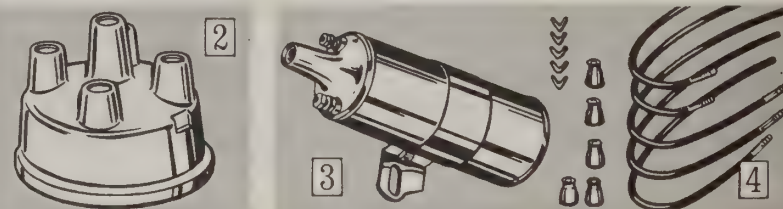

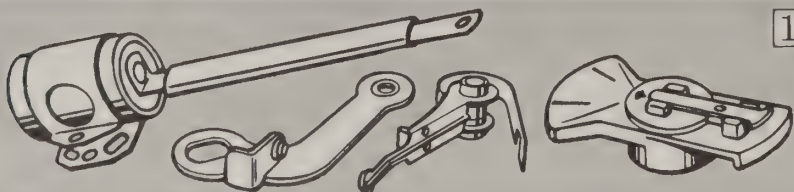

New Distributors include points, rotor, condenser and distributor cap

More engine failures are the result of worn distributors than any other cause. The easiest, quickest and best way to eliminate distributor problems in your Jeep® vehicle is to replace the old distributor with a complete new one. Each new distributor includes points, rotor, condenser and cap—perfectly synchronized, ready for installation in minutes (installation instructions included). Equals original equipment specifications—restores new-car distributor efficiency. Order from chart at right.

Voltage Regulators

Poor performance by a voltage regulator is one of the main reasons for premature failure by a battery, generator or alternator. So, whenever you recharge your battery or install a new battery, generator or alternator, be sure to check regulator. These regulators designed to original equipment specifications; preset for specific vehicle.

Does your Clutch slip or chatter?

If so, it's wasting power and gas . . . increasing wear and tear on transmission and gears

Replace it NOW with a brand-new Clutch Plate and Pressure Assembly Set

Why put up with a tired or sick clutch that grumbles and grabs . . . gives you sluggish takeoff and acceleration . . . refuses to make full use of the power your engine develops . . . and shortens the life of your transmission, gears and other drive line parts?

Especially when it's so easy—and economical—to bring clutch performance back to par again with a new Clutch Plate and Pressure Assembly Set. Brand new . . . not rebuilt . . . no trade-in required. Made of the finest materials . . . built to equal or exceed the performance and service life of original equipment. Designed for positive engagement and release to give you fast, smooth, quiet performance in both street and off-the-road service.

1 Clutch Pressure Assembly. Heavy-duty springs and fingers. Precision-ground facing to help prevent slipping and to make plates last longer. Static balanced to help eliminate vibration. Order from table below.

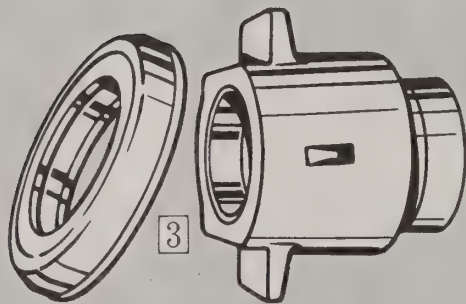

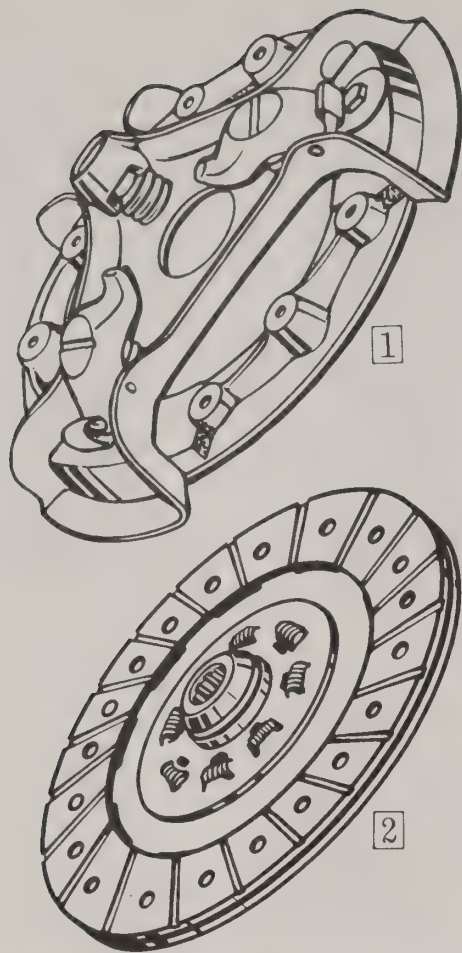

2 Clutch Driven Plate. Flexible spring center distributes load evenly over springs that are permanently held in place by welded construction . . . provides smooth, efficient clutch action. Wire-reinforced high-grade asbestos facings (endless woven or molded type). Precision-machined forged hubs. Order from table below.

SET includes (1) and (2), matched for the installation.

Help put an end to those costly, ill-timed repair bills that mount up because of transmission problems. Often a patch-up transmission repair job can lead to failure when you put it to the test again. On the other hand, an all new Sears transmission, with all parts perfectly matched, will give you smooth dependable service.

These brand new transmissions are complete, and engineered to original manufacturer's specifications. All functional internal parts included, plus the top tower shifting mechanism. Just add lubricant and you're ready to go. *See guide below before ordering.*

save wear on front-drive train of 4-wheel drive

Even when you disengage 4-wheel drive, your front drive train rotates. The result is unnecessary parts wear, wasted power and lost gas mileage. Select Drive Hubs let your front wheels "free wheel" in 2-wheel drive, lock into 4-wheel drive. No special tools or drilling needed. Box of 2.

NOTE: "F" items (as F28 LM 6612V) sent from Denver, Colorado. Pay shipping and handling charges from catalog order plant. Allow extra time. No C.O.D.'s.

SHOCK ABSORBERS for Jeep Vehicles

These shocks handle all sorts of rough terrain—on or off the road—because they're built with hardened steel pistons and because they're precision constructed. New shocks help to make your ride steady, smooth and comfortable

Low as **\$5⁶⁹**

1 Your Jeep® vehicle probably undergoes more wear and tear than you'd expect. Rough roads and off-the-road rugged driving puts a super-strain on your shocks, so it's important to have ones you can depend on for long life. Here are shock absorbers that *equal* original equipment quality, being engineered to very precise standards and tolerances. They include resilient rubber bushings to add to the cushioning effect, providing you with a comfortable ride. You can expect long spring life, too.

The piston rod has a special rust-resisting "micro finish" to aid in preventing the biggest causes of shock absorber failure: corrosion, wear, stone damage. These shocks are designed to resist fade—designed to resist the tendency to go "mushy"—and are made to help give you a quiet ride. Order 2 from chart below—one for left, one for right side.

New WHEEL CYLINDERS

Low as **\$475**

NOTE: To order correct size, peel back rubber boot on cylinder end and accurately measure piston diameter. Order at left.

Want to stop brake fluid leaks that cause dangerous brake grab? New wheel cylinders may help you. A small fluid leak onto a brake lining can cause possible brake failure, and at no time can you afford to lose control of your Jeep® Vehicle. Large fluid leaks will create brake slippage or harmful wheel drag. Wheel cylinders are brand new, completely assembled—ready to install. They're precision machined. Walls are honed 20-millionths of an inch for smooth operation of all moving parts. Order from chart at left.
